The WR-500/90 is designed to withstand the rigors of high volume, continuous use without loss of speed, accuracy or efficiency.

The WR-500/90 Coin Wrapper Series delivers dependable, high-speed coin wrapping performance for organizations that require efficient and accurate processing of large coin volumes. Built for continuous operation, the series is engineered to maintain consistent speed, precision, and reliability in demanding environments such as cash centres, armoured carriers, mints, and other high-volume applications. Designed with operator efficiency in mind, the WR-500/90 features an intuitive LCD control interface with multilingual support, allowing users to easily manage settings, monitor processing information, and optimize daily workflows. Advanced coin detection technology identifies and separates foreign materials and incorrect denominations, helping reduce errors and maintain the quality of wrapped coin. With enhanced coin transport and stacking technology, the WR-500/90 provides smooth, uninterrupted operation while improving productivity and reducing manual intervention.
