

OVERVIEW:

Manual handling of bills and coins at the point of sale (POS) is inefficient, time consuming, and presents a number of risks with regards to shrinkage, acceptance of counterfeit bills & coins, and limits the time your team members have to engage with your customers.

Gemsys POS cash recyclers take the manual handling of cash out of the hands of your team members and automate the customer experience.

THE FACTS:

Consumers want a choice when it comes to payment options. Acceptance of cash payments for many businesses cannot be ignored, or withdrawn but it can become a lot more efficient.

BENEFITS:

Improving the customer experience, along with your team members experience is a win-win situation for all businesses. By allowing your team members to engage with your customers may become the differentiating factor that brings your customers back time after time. More efficient and secure handling of the cash in your business reduces operational complexity and mitigates both internal and external threats to your bottom line profitability.

FUNCTIONS:

A POS cash recycler allows your customers to pay with coins and bills. They simply insert bills and loose coins into the machine when prompted. The machine accepts the payment required and returns the correct change all within seconds, fast, efficient and secure. Cashiers no longer have to touch or count cash, they simply enter the transactions into your existing POS system, cash is secured inside the POS cash recycler. End of shift and end of day processes can now be optimized and require much less time to complete.

FEATURES: & BENEFITS

- Improve the customer experience and differentiate your business
- Take the complexity out of the cash handling process
- Free up operational and administrative time to engage with your customers
- Provide your team members with more efficient tools to drive bottom line profitability
- Direct cash sales to a more effective and efficient “PayPoint” and reduce hardware costs associated with your POS system
- Reducing cash touch points for those businesses that require more hygienic handling of cash. Such as Food retailers, Supermarkets, Pharmacies & Restaurants
