

WEBSAFE™ helps to reduce the complexity of operating a restaurant by ensuring cash handling is simple, secure and accurate. Our WEBSAFE™ users report less complexity in their process, improved deposit accuracy, fewer cash variances and significant time savings! WEBSAFE™ units installed at the point of sale secures the cash and provides increased health and safety measures for crew members with one touch cash processing.

Some of our McDonald's WEBSAFE users include:

"The GEMSYS WEBSAFE system has been a game changer for our restaurant. The seamless transition to this system was amazing. It has saved countless hours on cash balancing and labour. I highly recommend this system."

—Chuck Soulliere
Owner/Operator
McDonalds Hanover
& Listowel

"During the early days of COVID-19, it was reassuring to know that our folks did not handle more money than they needed to. The fact that the majority of money only touched one hand allowed us to have one further control measure already in place."

—Rory MacKinnon
Proud Owner/Operator
McDonald's Restaurants
Alliston, Caledon, Angus,
Schomberg and Orangeville

"The list is endless on how we can use the time saved by the GEMSYS WEBSAFE solution. We have found the reconciliation of deposits is quick and easy and much more accurate. Our cash plus and minus has improved since the installation of GEMSYS WEBSAFE and continues to show little variance between the expected and actual count. "GEMSYS WEBSAFE in a short time has more than paid for itself and eased the stress of operating our business for both our management and crew."

—Brent Kelly, Owner/Operator
Collingwood & Wasaga Beach Ontario
