The SB-9 Currency Discrimination Counter

Impressive Standard Features

The SB-9 provides fast and accurate counting of Canadian, U.S., Euro, Pound, and Yen currencies. The SB-9 provides several modes of operation including "mixed" mode, giving the ability to count mixed bills in a single pass and provide the total dollar value as well as the individual value for each denomination counted. Sort paper from polymer bills saving countless hours.

Improve Accuracy; Ensure Savings!

The SB-9 will save you hours of time counting and processing bills, and will provide superior performance compared to old style currency counting technology. Accurate and reliable performance every time will ensure that you're not wasting valuable time reprocessing bills. SB-9 utilizes the most reliable image processing technology combined with superior mechanical reliability to deliver fast accurate results every time you use it.

Reliable and Fast

The SB-9 is a commercial quality currency processing device, designed to meet the day-to-day challenges of processing and counting in banking, foreign exchange, retail, and gaming environments. With its unrivaled accuracy, versatility and speed, the SB-9 will simply outperform many of its competitors. Variable count speeds up to 1500 bills per minute, selectable pre-set batch settings or user selectable batch settings can all be accessed using the 10 digit keypad.

Big Savings in a Small Package

With a modern design, full graphic 2.8" LCD display, and a user-friendly interface, the SB-9 provides the user with a simple, efficient device to improve productivity and count accuracy. This compact desktop counter (H 28.0 cm x W 26.9 cm x D 26.1 cm) provides more functions than a standard currency counter. Functions such as rejecting "suspect" bills into the reject pocket without stopping the count, network connectivity, accurate counterfeit detection and rejection are just a few.

Four Different Modes

Mixed Mode allows for counting of mixed denominations

Single Mode is used to sort bills into individual denominations

Face Mode is used to face bills

Orient Mode is used to orient bills
