

QuickChange™

Consumer, self-service coin deposit solution

Bag coin collection

The QuickChange™ is a self-service coin deposit solution that provides customers with a fast, convenient way to deposit loose change while reducing wait times and improving the overall branch experience. By automating coin deposits, QuickChange™ increases staff productivity and allows employees to focus on higher-value customer interactions.

The QuickChange™ self-service coin deposit solution is designed to make coin deposits faster, safer, and more convenient for both customers and branch staff. Its automatic coin feed system provides secure, continuous processing, while the simple two-button interface makes operation quick and intuitive. Customers can pour coins directly into the hopper without coming into contact with moving components.

To maintain accurate processing, QuickChange automatically identifies and separates foreign objects, unsupported currency, and counterfeit coins from the coin mix. Accepted coins are sorted by denomination and deposited into individual collection bags, supporting efficient coin handling and simplified cash management.

Colour-coded status indicators on both sides of the unit provide staff with a clear view of machine status and bag capacity, allowing coin bags to be emptied before they reach full capacity. The cabinet accommodates up to 12 configurable collection bags, enabling multiple bags to be assigned to higher-volume denominations and reducing the frequency of bag changes.

Processing Speed	2500 mixed coins per minute
Capacity	12 bags, up to 10,000 coins per bag, diameter dependant
Sort capability	Fully sorted or mixed sort
Power supply	100 – 240V AC, 50/60 Hz + 1%
Power consumption	840W
Dimensions (H x W x D)	63.8"* x 25" x 41.1" (1620* x 637 x 1045 mm)
Weight	372lbs. / 168.7 kg
Display	12" color graphic LCD user screen
